## EXHIBIT B PD DESIGN STATEMENT & DESIGN MAP

Millennium is being proposed to the City of Corinth by Lakeview Parkway Partners, LP. The site is ideally located on the east side of I-35E and north of the existing Dobbs Rd. In conjunction with the proposed thoroughfare plan, Millennium will be optimally located within the proposed loop, along with access to the proposed Dobbs Rd. Currently, the site is bordered by South Denton Storage and an undeveloped lot to the north, Sarang Prayer Center and undeveloped lots to the east, and Metroplex Roof and Fence and an undeveloped lot to the South.

The proposed development, along with the adjacent properties to the north, east and south are currently zoned as MX-C Mixed Use Commercial. The Future Land Use for the site, along with the adjacent properties to the north, east, and south are proposed to be Mixed Use Non-Residential. The proposed development does not include proposed streets or ROW, but will be accessed through access easements/fire lanes. The site contains little to no trees, and has a gentle slope from the southwest to the northeast with approximately 8' of elevation change. The proposed 1.5 acre amenity pond will be utilized as a wet amenity pond and to meet detention requirements. A 10" sanitary sewer line is located approximately 500' of the NE corner of this site and runs parallel to the railroad tracks on the west side, and an 8" sanitary sewer line also runs along Dobbs. There is a 12" waterline along I-35E ROW and an 8" waterline along Dobbs. The proposed sequence of development is shown on the Exhibit "D" Zoning Concept Plan. PH 1 will include Area B-Residential 6.067 acres, Area C-Open Space 2.693 acres, the proposed fire lane and access easement, along with the non-residential trigger event requirement proposed in Section 2G-6.

Millennium is a mixed-use development designed to be a lifestyle destination for the City of Corinth. It includes both residential and non-residential uses in a walkable setting that frame a linear water way with a plaza at one terminus and a 1.5 acre pond at the other. Millennium's layout was inspired by ancient Corinth in Greece.

*Corinth Canal (Source: Google Images)*

The design intent is to pay homage to the ancient city by gracing the open space between I-35E entry and the 1.5 acre pond with enhanced pedestrian paving, large canopy trees, lighting, street furnishings, landscaping, water feature, and a meandering brook highlighted with natural stone.

Canvas and lighting above the pedestrian walkway between the two towers creates a human-scale environment and the gateway for Millennium.

*Example of canvas and lighting across pedestrian plaza (Source: Google Images)*

The plaza will become a gathering place for the community and will include outdoor dining opportunities and a water feature or statue.

*Example of outdoor dining in the plaza (Source: Google Images)*

*Example of water feature in the plaza (Source: Google Images)*

The pedestrian circulation is a critical element of the design for Millennium. As each building is constructed, a planned pedestrian connection to the main trail system is required. As a live, work, and play community, the design enhances the pedestrian experience in order to move people between the uses regardless of where they have parked. Millennium's concept is to create an environment for people that is comfortable, enjoyable, and at the human scale rather than a typical auto-oriented development.

The linear water way will include an intimate stream for patrons to enjoy in a park-like setting as they traverse through the community's trail system or while waiting to be seated in one of the nearby restaurants. The natural ambiance created by the water way will be a positive recreational amenity for both patrons and residents to enjoy. The edges of the water way will be treated in a variety of ways to give visitors a mixture of experiences. The meandering brook will be portrayed as a natural stream garnished with large natural stone and landscaping, which feeds into a rock waterfall that spills into a 1.5 acre pond. The pond edges will also have several treatments. A manicured lawn with a gentle slope to the water's edge on the east will transition to taller native grass areas to the west to symbolize the marrying of the built and natural environments.

*Example of waterway between buildings (Source: Google Images)*

The two principal buildings along the highway will have towers at each end which represents the Acrocorinth Towers of Ancient Greece.

*Acrocorinth Towers (Source: Google Images)*

The design of the building facade will respond to the transformation from ancient Corinth to modern Corinth. The traditional building material, limestone veneer, is applied to the towers, then, it transitions to masonry veneer with a louver screen, and ending with the contemporary cladding system to enhance the contemporary Texas Prairie style of architecture See Exhibit "F" for the Residential Conceptual Elevations and Exhibit "G" for the Retail Conceptual Elevations. Building architecture within Millennium shall be complimentary to these elevations to create a cohesive development.

Millennium will be Corinth's premier mixed-use destination for both citizens and passersby to enjoy the dining, retail, office, and residential opportunities. The plaza and amenities can be used for civic events or festivities for the community. The following Design Map represents the design intent for this development.
