

STEPS FOR COMMERCIAL BACKFLOW TESTING

The state requires all commercial backflow to be tested annually. BSI Online has sent out the letter that you have received to notify you that it is due for testing. This is something that only has to be done once a year.

BSI Online has a list of approved backflow testers that you may contact to test your backflow. The tester is aware that they have to get the backflow testing *form* from BSI Online. Once complete the customer needs to keep a copy of it for three years.

Here are some helpful steps after receiving the letter.

- Contact approved backflow tester which you can choose one from BSI Online
- Return testing form to BSI Online and keep a copy for your records
- The establishment has thirty days to submit form to BSI Online

If you have any further questions, contact the Public Works Supervisor at (940)498-7522 or the Permit Department at permits@cityofcorinth.com
